RECENT PROJECTS

ERP Management System - (erp.conversiontab.com)

- Currently working in ReactJS + TypeScript Web Application with Redux for state management
- Created simple and intuitive interfaces that make it easy for users to manage complex tasks
- Added visual graphs to help users analyze data and make smarter decisions
- Worked with a team to successfully develop and deploy the ERP system, contributing to better business organization and success.

QuidTutor - (quidtutor.co.uk)

- Online Tutoring PHP and React.js based Web Application
- Worked in ReactJS + TypeScript Web Application with Redux and Redux Thunk middleware for state management
- An online Education and Course Selling Website System like Udemy.com

Pawcker - (pawcker.com)

- Very excited to show you, it was my first real-time project and I mainly worked on the frontend using ReactJS and Sass for UI design.
- Pawcker.com is a platform for those people who want to participate in dog sports by helping them to track their all records and gives a clear visual representation.
